CAR SERVICE SYSTEM

About
OUR PROJECT

TECHSTACK USED:
- HTML
- CSS
- JAVASCRIPT
- DJANGO

CAR
CARE

WHY DJANGO ?

Django is a high-level Python web framework that enables rapid development of secure and maintainable websites. Django takes care of much of the hassle of web development, so we can focus on writing our app without needing to reinvent the wheel.

GOALS

- Increasing Productivity: Fine tuning systems to achieve the best output for the inputs.
- Improved Customer Satisfaction: This may mean increased customer satisfaction scores, increased customer retention, decreased service complaints, or changes in reviews or responses online.
- Increased Employee Engagement & Satisfaction: Improving workflow to better engage and support your employees to improve productivity and reduce turnover.

PROJECT FLOW

Car service Management System

Login & Register

- At this stage if user is a new customer then he/she is asked to Register to our site.
- And Existing user is asked to Login through respective credentials

Data Base

- We have used default database .
- This is another conviencing reason to use Django framework
- It keeps track of login register and contact forms

Appointment & Billing

- Various services are provided
- one has to select one or more
- The user will get a bill reciept before confirmation of Appointment.

Feedback & Contact Form

- This helps the user to ask a query or give an advise if any.
- This is conected to DB.

Terms & Conditions

- Another nice feature of django is it let the user to directly download the reciept of booked Appointment

FUTURE IMPROVEMENTS

- We can connect well establish API from Google to directly search a garage on Map.
- We can even book appointment as per schedules of the user by connecting our site with that of user's event manager
- We can hire a transporting partner to even schedule the delivery of vehicle.
- Door to door service can be achieved.

FUTURE PATH
